

# iPad Apps for Therapy Environments

To see these apps please go to [www.Assistivetechworld.net](http://www.Assistivetechworld.net)

PLEASE NOTE: These apps are not endorsed by my employer; prices are constantly changing, and apps come and go very quickly. Multiple companies have donated their software and apps for use in training and evaluation but these donations have not biased the therapist towards any product and or service. If you see an app for free that you think you may like, get it now! Do not wait because the price may rise tomorrow...If you have a favorite app or find one that you love please send the name to [assistivetechworld@me.com](mailto:assistivetechworld@me.com) and I will add it. THANKS!
